

STANDARD OPERATING PROCEDURE (SOP)

OPERATIONAL DESK MANUAL: END-TO-END CASE TRACKING ECOSYSTEM

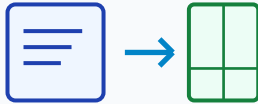

DOC REF: SOP-OPS-V2-DEMO
ENVIRONMENT: EXCEL & USB LASER
SCANNER
AUDIT STANDARD: COMPLIANT (SLA)

STEP 1: DAILY INTAKE & BATCH INGESTION

SHIFT START

Automated parsing of unformatted daily intake logs into structured records. (Tool: [daily-intake-data-normalizer-demo.html](#))

- **Load & Normalize:** Open normalizer app and click *Load Sample Data* (or drag PDF/TXT batch export).
- **Auto-Validation:** System cleans rates, identifies legal streams, and checks for document combinations.
- **Paste into Matrix:** Click *Copy Table for Excel*. In **Case Tracking Matrix**, paste as **Values (123)** into Col A.

MANDATORY RULE: Always use 'Paste Values' (123) to preserve native matrix formulas.

STEP 2: DESK VERIFICATION & CONTACT LOOKUP

DATA QUALITY

Quality control, exception resolution, and contact registry preparation. (Tool: [operations-tracking-matrix-demo.xlsx](#))

- **Resolve Flagged Entries:** Review amber alerts for uncertain cases (e.g. fee waivers, missing ID numbers).
- **Contact Registration:** Enter citizen email in Col H to prepare automated batch mail merge notifications.
- **Formula Lock:** Columns I to Q are automated tracking pipelines—never overwrite manual data.

SECURITY LOCK: Do not alter Cols I to Q; formulas calculate tracking states dynamically.

STEP 3: INBOUND DIPLOMATIC POUCH INTAKE

COURIER ARRIVAL

Receiving physical shipments from headquarters using high-speed 1D laser scanners. (Tool: [Inbound Diplomatic Pouch \(Tab\)](#))

- **Pouch Batch Intake:** Open *Inbound Diplomatic Pouch* tab. Enter dispatch pouch date & reference ID.
- **Continuous Laser Scanning:** Scan barcodes on physical envelopes (IDs) and booklets (Passports).
- **Automatic Status Transition:** Scanned records automatically transition to **READY AT DESK**.

FAST SHORTCUT: Press [Ctrl + ;] to automatically stamp today's date in any active cell.

STEP 4: COUNTER HANDOVER & INSTANT ARCHIVAL

SHIFT CLOSE

Frictionless counter handover with end-of-day batch scanner archiving. (Tool: [Counter Delivery Batch \(Tab\)](#))

- **Counter Handover (No PC):** Citizen signs paper receipt slip → Hand over document → Drop slip in tray.
- **Day-Close Batch Scan:** Take stack of signed slips and scan barcodes into *Counter Delivery Batch* tab.
- **Instant Archiving:** Case status instantly updates to **ARCHIVED / DELIVERED** in the central matrix.

OPERATIONAL EFFICIENCY: Never operate PC during counter service; process all slips in batch at shift close.

SLA MANAGEMENT BY EXCEPTION (HOY - INTAKE DATE)

[GREEN] ON TRACK (≤ 40 days): Normal production & diplomatic courier transit.

[AMBER] WARNING (41 to 60 days): Monitor transit; preventive database verification.

[RED] SLA BREACH (> 60 days): Isolate in 1 click; trigger formal HQ tracer.

ESSENTIAL DESK SHORTCUTS

- **[Ctrl + ;]** : Stamps current date automatically.
- **[Alt + Down]** : Opens YES/NO dropdown menu.
- **[F9]** : Forces full workbook formula recalculation.
- **[Ctrl + V]** : Paste Values (123) to preserve matrix formatting.

PHYSICAL STOCK STATES

- **READY AT DESK:** In post, ready for notice.
- **PARTIAL:** 1 doc arrived (dispatch notice).
- **DELIVERED:** Handed over & archived.
- **ESCALATE:** Delayed >60 days at HQ.
